

Decoration Labelling

of round products

Labelling machine type GU/RV6-ALS

The GU/RV6-ALS has been developed for the labelling at cylindrical surfaces and optional at the bottom or on the cap of round, conic products, such as aerosol cans, plastic packs, cups, bottles etc. The machine is suitable for soft or hard, filled or empty products. The products are labelled in a pivotal centre either in continuous operation, or they are tacted and labelled adjusted to the girth. This is necessary when the label shall be placed according to a reference point on the product or a higher output range is requested.

Technical specifications:

- Basic frame in aluminium with cover of stainless steel, GMP design
- 6-figure pivotal centre, quick-change
- Output range of 30 – 120 pieces/min.
- Vacuum belt for conic products
- Siemens S7 automatic control
- Customized labelling heads
- Easy operation
- On-top label is optional
- Voltage: 230/400 V 50 Hz
- E-Consumption: 5 kVA
