

Decoration labelling

of cups, bowls, bottles...

Labelling machine type GU/RV 10

The GU/RV 10 has been developed for the labelling of round, conic, flat, oval, angular products such as e.g. cups, cans, bowls, pots and bottles. The machine can be used in offline or online mode, and as well with or without de-stacking or re-stacking magazine.

In a carousel are the products turned/placed for the labelling according to their individual shape due to an elaborated cam control. So a costly servo mechanism is not necessary.

Technical specifications:

- Basic frame in aluminium with cover of stainless steel
- 10-recessed format carrier plates
- Output range up to 250 pieces/min.
- Siemens S7 automatic control
- Customized labelling heads
- Easy operation
- On-top label is optional
- Voltage: 230/400 V 50 Hz
- E-Consumption: 5 kVA
