

Labelling of cardboards

Traceability according to EU regulation 178/2002

Labelling of cardboards

The cardboards are labelled at the side or cornerwise with inline printed labels in continuous operation. This ensures the identification of the cardboard on two sides.

Due to 64-bit high-performance printer with self-cleaning thermal transfer print head and automatic print dot control a costly vacuum application is not necessary.

Print dispenser system ALX 92x

- Labelling in continuous production
- Without applicators
- Speed of cardboards up to 22m/min
- 64-bit processor
- Length of the ink ribbon 1000 m
- Self-cleaning print head
- Automatic dot control
- Quick-change system without tools
- Economical use of the ink ribbon is standard
- RFID capability
